

With Regulation 1907/2006/EC of the European Parliament and Council from the 18th of December 2006, REACH entered into force on June 1st 2007. We offer you tailored Services to benefit from the implementation of REACH.

Ready for REACH Get experts on your side

2007 through 2010 will be key strategic years for all companies that are producing, importing and using chemicals. The implementation of REACH (and in parallel GHS) requires companies to prepare for and manage a huge number of internally and externally focused activities. These range from raw material and chemical products review, data and testing gap analysis, current and future classification & labelling, identification of all uses of a substance, up to the strategic planning process. The latter includes identifying any opportunities for exemption from REACH, obtaining derogations from testing due to low concern/exposure, or justifying chemical groupings and read-across strategies for specific environmental behaviour, exposure scenarios or toxicological endpoints. Moreover, pre-registration and registration is required and the completion of Chemical Safety Assessments.

CHEMSERVICE provides strategic and technical support to get you **READY for REACH!**

Our portfolio includes:

- ✓ Review of product portfolio and regulatory status assessment
- ✓ Exemption and authorisation determination
- ✓ Data search, assessment and gap analysis
- ✓ Testing proposals placing and monitoring of Studies
- ✓ Pre-registration, Registration and Dossier Preparation
- ✓ Compilation of CSRs and SDSs
- ✓ Client Representation in Consortia, developing efficient consortia approach
- ✓ Only Representative Service
- ✓ Data Brokering and Document Management

In addition to the REACH Registration, we coordinate registrations for chemical inventory listings or Food Contact Approval petitions (e.g. US FDA, FCN, EU List).

CHEMSERVICE is advising on Classification & Labelling according to Chemical Control Legislations and is reviewing, creating and updating Material Safety Data Sheets (MSDS/SDS), Product Labels for Supply (Hazard Labels) and Transport Labels. Furthermore, we help to respond on regulatory affairs related customer requests and questionnaires or produce for our clients substance specific Regulatory Data Sheets (RDS), which enable an efficient handling of customer questionnaires.
