

Letter-of-Access (LoA) Handling and SIEF Financial Services

Consortia Management GmbH was set up by Chemservice and Projacon in order to combine REACH Expertise and Consortia Management skills together with Financial Management competence and Accounting Capacity, coupled with organizational skills.

Chemservice is a well known Regulatory Affairs service provider (www.chemservice-group.com), covering long lasting experience in international chemical control legislation, toxicology, risk assessments and environmental sciences. Projacon is a financial and tax consultancy, consisting of experienced tax consultants, financial auditors, controllers and financial experts (www.projacon.de). Trustee accounts in Germany can only be managed by limited professions – besides notaries and lawyers - only tax accountants are licensed.

We are already providing Letter-of-Access Management Services to Consortia, which have contracted us to act as their Coordinator or Secretariat. Due to increasing requests received from external Consortia, Lead Registrants or SIEF Lead Members, we are expanding our services to all interested parties.

The Financial SIEF Services provided by Consortia Management GmbH can be optionally and individually contracted and will include the following services:

- Cost Calculation for Letter of Access (LoA) or License to Use (LtU)
- Trustee Account setup and management
- LoA Handling
- Contract Management (e.g. SIEF and Data Sharing Agreements)
- Compensation of Data Holders
- Refunding of Beneficiaries (early registrants, data holders), e.g. calculation of refunds per beneficiary of surplus funds contributed by late joiners
- SIEF Communication
- Data Archiving

An automated online “Letter-of-Access Tool” will be available at www.reach-loa.com soon. It will provide an efficient LoA Management for SIEF members to acquire access rights for a specific substance to the submission of the joint REACH dossiers.

Our generic price structure or dedicated quotes can be provided upon requests.
